Customer Spotlight

ChromaLuxe[®]
True to your vision[®]

“ My motto is I don't shoot how it looks, I shoot how it feels. And I think that ChromaLuxe embodies that in their prints.”

Devin Williams, Photographer

ChromaLuxe Customer Spotlight:

DEVIN WILLIAMS

Capturing dazzling sunset cityscapes to vibrant panoramas, photographer Devin Williams photographs the heartbeat of Nashville. With the city growing at an exponential rate, Devin has been photo-documenting Nashville through the years and exhibiting the changes through his work. To best showcase his commissioned photographs, he is always on the lookout for the ideal medium for displaying prints.

The first time Devin saw ChromaLuxe products was through his print lab, Bay Photo. He was immediately drawn to the high quality of the ChromaLuxe large format outdoor panels. The growth in Nashville means lots of new commercial and residential buildings in need of outdoor displays. ChromaLuxe EXT metal panels fit the bill perfectly – not only were they durable, but the panels faithfully exhibited the vibrancy of the original photographs.

The first large outdoor project Devin printed was a 40x60 metallic print, a big step from his previous 20x30 canvases. Rich colors and deep blacks of metallic panels reproduced the kinetic feel of the city Devin captured in his photographs, providing a breathtaking end result.

The ingredients for completing the perfect project are the right piece of art, paired with the trust of a high-quality print lab, and completed with the best medium for display. Devin found his trifecta with Bay Photo and ChromaLuxe, the perfect complement to his prints. With the long-lasting durability of the metallic panels, his photographs will continue vibrantly telling Nashville's story for years to come.
